

### A breath of fresh air

With the growth of the campervan market and the trend for campers seeking smaller leisure vehicles that they can use as their everyday vehicles, there comes challenges for manufacturers. These campers still want the same levels of comfort – and thanks to the new Telair

clima e-Van air conditioner, they can. This new launch is the smallest roof-mounted air conditioner available on the market at just 71cm by 23cm, and is an ideal solution for campervans and smaller campers. It provides silent air cooling and warmth and uses an R32 gas refrigerant has been used as it has the lowest

Global Warming Potential (GWP 675) that is currently found on air conditioners for vehicles, with a 70% reduction in environmental pollution power, compared to gases that have been used to date. It can be operated by supplied remote control and also features a multi-function blue LED light that can be

switched on and off via the remote.
