## BALLISTOL STINGFREE MOSQUITO SPRAY

Stingfree protects for up to six hours against irksome insect bites such as from gnats, stinging flies, gadflies, mosquitoes, sandflies, tropical mopane-flies and tsetse flies.

Just spray it on your skin and forget about gnats and gadflies. Stingfree has been tested for its toxicological harmlessness and is successfully used on all continents: Be it in the tropical jungles of Brazil, the gnat-ridden forests of Finland, the subtropical rainwoods of the Himalayas, Africa or the subtropical zone of Australia, Stingfree convinced its users in any part of our world.

Due to the plant oils that it contains, Stingfree, with its pleasant smell, also cares for your skin and protects it against dehydration. The UV-B filter that it contains also protects your skin against sunburn.

## LIPPERT FURRION VISION S

The innovative Furrion Vision S range of cameras and wireless kits not only eliminates blind spots during manoeuvring, but also offers surveillance of the area around camper vans, trucks, special vehicles, trailers and others. The systems are highly reliable, thanks to the use of 2.4 GHz digital wireless communications, which offers stability and long range up to 150 metres. All cameras in the range assure clear imaging, wide angles of view and night vision, while the monitors are available in three sizes – 4.3, 5 and 7 inches – with the option to view images from side and rear cameras as well as those mounted on the vehicle's doorways. The smallest monitor displays only a single camera's feed, while the two larger models can display up to four, either one at a time or all together.

## BLACK DIAMOND MISSION 2P

The Mission 2P is a fast pitching double wall tent built for mountaineering and expedition style pursuits. The hoop and hub exterior pole architecture of the Mission combined with the pre-attached fly allows the tent to be easily pitched in even the worst conditions. This unique hybrid dome/tunnel design is engineered to withstand high wind loads from all directions, while the scalloped perimeter and large vents provide ample airflow. The 30d high tenacity polyester fabric is seam-sealed, durable and does not sag in wet environments. Twin doors and double vestibules allow leeward access in strong weather, making the Mission a bomber shelter for basecamp layovers or high-altitude adventures.

## TELECO T-NSA10DAB

When touring with a camper, a multimedia system provides valuable driving assistance and can be an excellent travelling companion for the entire family. Teleco – a specialist in technological solutions for RV communications, energy management and entertainment - now presents a new Android-based product featuring a 10.1" touchscreen, one of the largest on the market. Compatible with all dashboards that can accommodate double-DIN frame systems (e.g. Fiat Ducato, Citroën Jumper and Peugeot Boxer), the new T-NSA10DAB has a tilt-adjustable screen that ensures optimal viewing at all times.
