

Teleco presents an Android-based multimedia system with 10.1” touchscreen, specially designed for campers

The new T-NSA10DAB can be installed on vehicles that are double DIN ready. During installation you can decide whether to position the screen vertically, thus tailoring the display to your specific needs. Pre-installed apps include Google Maps, Spotify, Google Play Music, Whatsapp and Netflix

Lugo di Ravenna (May 2022) – Radio, sat-nav, entertainment. When touring with a camper, a multimedia system provides valuable driving assistance and can be an excellent travelling companion for the entire family. Teleco - a specialist in technological solutions for RV communications, energy management and entertainment - now presents a new Android-based product featuring a 10.1” touchscreen, one of the largest on the market.

Compatible with all dashboards that can accommodate double-DIN frame systems (e.g. Fiat Ducato, Citroën Jumper and Peugeot Boxer), the new T-NSA10DAB has a tilt-adjustable screen that ensures optimal viewing at all times.

An integrated receiver lets you tune into both analogue radio broadcasts on AM and FM bands with RDS and digital ones compatible with the latest DAB+ standard: the specific antenna is included. Bluetooth connection to your smartphone means you can make phone calls hands-free or listen to your favourite music.

However, what really makes this multimedia system versatile is the Android operating system, the pre-installed apps and the ability to download more from the dedicated App store. To take advantage of all these functions just connect the T-NSA10DAB to the cellphone Wi-Fi hotspot so you can browse, download data and maps and enjoy audio and video streaming services.

Pre-installed apps include Spotify, Google Play Music and Netflix (the playback function of which can be disabled while driving for safety reasons). Whatsapp and Google Maps complete the array of basic apps.

Needless to say, an integrated GPS receiver allows for satellite navigation. If you prefer not to use Google Maps to avoid “consuming” data from your cellphone plan, there’s the option of purchasing BeNomad navigation software. Optimized for motorhomes, this includes maps for 43 European countries.

The T-NSA10DAB system can also read USB sticks (via the rear sockets) or memory cards in microSD format (via the frontal slot). What’s more, audio and video inputs allow you to connect an external camera to provide, for example, assistance when reversing.

On the hardware side, the Android 10 operating system runs on a Quad Core ARM A7 1.2 GHz processor, two gigabytes of RAM and a 16 gigabyte flash memory. Touchscreen resolution is 1920 x 1080 pixels (Full HD). From an audio viewpoint, internal Mosfet amplification guarantees 45 watts of power on four channels, while those who prefer a more customized system have four pre-amplified audio outputs and a dedicated subwoofer output at their disposal. A built-in 9-band equalizer allows for perfect audio calibration.

The T-NSA10DAB system is already available from authorised Teleco Group dealers.

TECHNICAL SPECIFICATIONS

Functions	Specifications
FM/AM tuner with RDS	Android 10 operating system
Built-in DAB/DAB+ radio, DAB antenna included	CPU quad-core ARM A7 4*1.2 GHz
Built-in GPS receiver	RAM memory 2GB DDR3
On-line navigation	Flash memory 16 GB
Network & Wi-Fi Hotspot	10.1 inch touchscreen
Bluetooth speaker	Resolution 1920x1080 pixel
A2DP music streaming	4*45W Mosfet Output amplifier
Mirror function towards smartphone via EasyConnection app	4 pre-amplified audio outputs
USB memory reader (3 rear)	1 pre-amplified subwoofer output
Frontal microSD reader	9-band graphic equalizer
Multilingual system	1 audio-video input
Selectable 7-colour GUI with RGB lighting	Music formats: MP3, WMA, AAC, RM, FALC etc.
Personalised welcome logo	Video formats: MPEG-1/2/4, H264, H263, VC1, RV, RMVB, DivX, Sorenson Spark, Spark, VP8, AVS Stream
Built-in programmable SWC	Image formats: JPG/BMP/JEPG/GIF/PNG
Rear video camera and frontal camera input	BeNomad map of Europe (43 countries) for campers (optional)

About Teleco Group

TELECO GROUP is a group of leading companies in the recreational vehicle industry, based in Northern Italy. Teleco SpA designs, manufactures and markets a complete range of devices and equipment for terrestrial and satellite TV signal reception, televisions, satellite navigation devices, cameras and monitors, multimedia systems and photovoltaic modules. Telair srl is specialised in the development and manufacture of air conditioners, generators and inverters. The Group's products are marketed throughout Europe where a widespread support network is available. The TELECO GROUP has two subsidiaries in France and Germany: Teleco GmbH and Teleco sas.
